

# ViRiDi FAMILY

The Carabetta Family is proud to bring our valued customers and consumers new innovative products that combines healthy, delicious and convenience! 45 years ago we were one of the pioneers in Individual Quick Frozen (I.Q.F.) portion controlled products. We have taken all those years of experience and developed our new innovative cube technology producing savory sauces into making healthy and delicious smoothies, fruit purees and 100% pure organic acai products. New innovations that will add convenience, safety and save cost for today's demanding consumer.

## The Process

Our proprietary cube freezing system takes fruit or vegetable purees that were pasteurized and aseptically packed at their peak of freshness, retaining all their natural flavor and vitamins. Our cubes are formed cryogenically within 12 seconds at a temperature -320 F°.

## The Cubes

With cubes we are able to blend ingredients into our smoothies like fresh yogurt, peanut butter, monk fruit, proteins, probiotics..and a range of naturally good and delicious flavors that competitors simply can't.

Since we process and package our own cubes and products in our certified SQF GFSI manufacturing facility, we are able to keep costs down.

## Social & Environmental Responsibility

We believe that it's the responsibility of the manufacturer to develop products and packaging that is both sustainable and environmentally friendly. We are audited by third party certified firms to assure we meet today's quality, safety, social and environmental standards. We purchase from vendors that share the same commitment as we do.

*"56% of the U.S. respondents feel that the food brands have the main responsibility for reducing plastic waste associated with food packaging".*

*Axel Barrett, Bioplastic News, 06/18/19*
